

Thank you for choosing First-Call Medical.  
To get started with your Mini Patch  
Monitor, please follow the steps below.

**Mini Patch Placement**

**Scan for Application Video**

- 1 Snap-in electrodes to the four arms of the monitor.
- 2 Apply the monitor as shown in the diagram.
- 3 Hold the red button down until the monitor vibrates.  
You are now in recording mode.

## Recommended Application Workflows

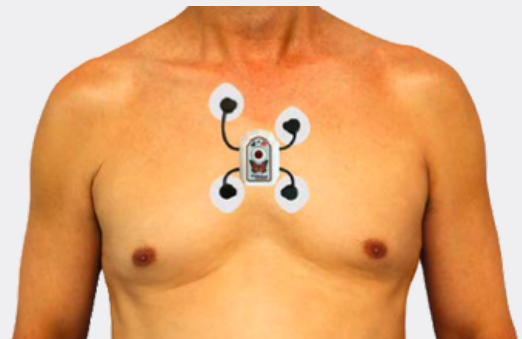

### PRIMARY WORKFLOW

- 1 Apply the monitor with normal or sensitive skin electrodes.
- 2 Remove the monitor while showering.
- 3 Charge the monitor while in the shower.
- 4 Re-apply the monitor with new electrodes after showering and adjust the placement slightly to help prevent skin irritation.

### SECONDARY WORKFLOW

- 1 Electrodes are good for up to 5 days.
- 2 On day 5, remove the monitor to charge. It takes one hour to charge a depleted (0%) battery.
- 3 Re-apply with new electrodes.

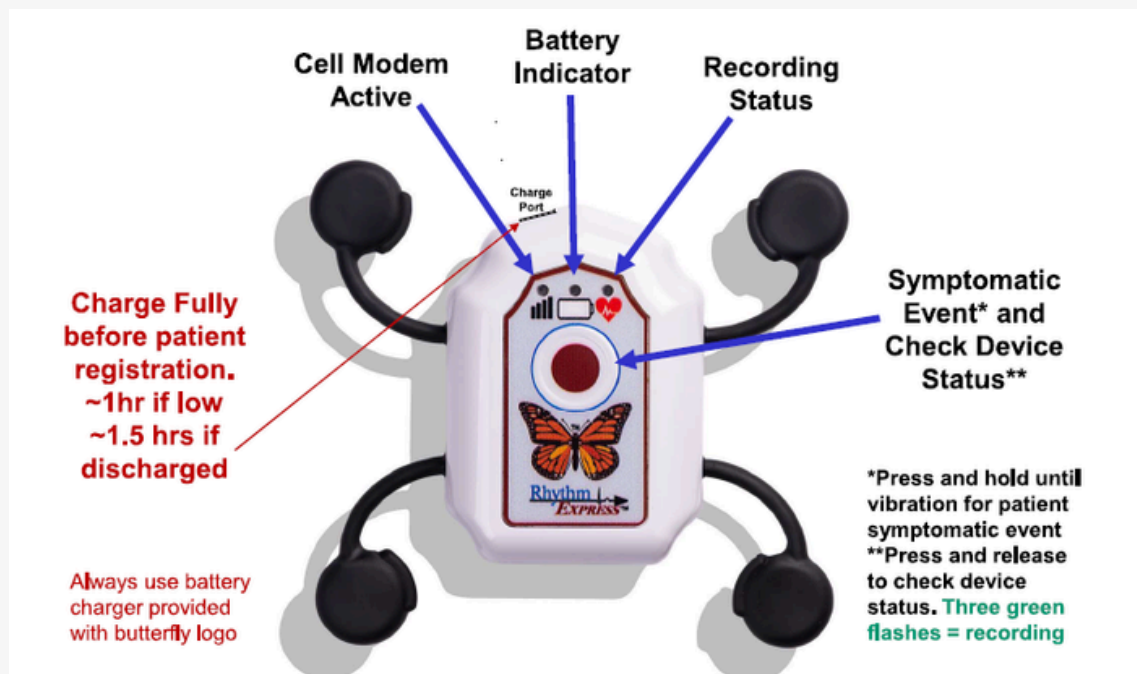

**Our Patient Use Guide recommends a placement that straddles the sternal groove, as shown here.**

## Mini Patch Monitor Useful Tips For Patients

### CARING FOR THE PATCH MONITOR

- ✓ The monitor **must be removed** from your chest before plugging it in to charge.
- ✓ The battery light will flash every 5 seconds if the monitor is charging. When fully charged, the battery light will be a steady green light.
- ✓ After the battery is charged, disconnect the monitor from the charger and reattach the ECG leads to the electrodes. The monitor will sense that the leads are reconnected, and monitoring will resume.

## Troubleshooting

**Our Receiving Center is open 24-hours a day, 365 days a year. For assistance, please call: 800-274-5399.**

Alert	Possible Cause	Solution
